

PSQL v13 JCL Release Notes General Release – June 2017

Contents

This file contains the following topics:

- [About Java Class Library](#)
- [Getting Started](#)
- [Known Issues](#)
- [Technical Support](#)

About Java Class Library

Java Class Library (JCL) is a set of classes that allow access to Btrieve data.

For information on new and changed JCL functionality in PSQL v13, see *What's New in PSQL*.

System Requirements

Existing installation of the PSQL v13 database engine if you want to use any of the features in that release.

Getting Started

The runtime files for the JCL access method are installed by default with PSQL Server, PSQL Workgroup, and PSQL Client.

The header files and sample files are available for download from the [Actian website](#).

Documentation

In the PSQL SDK documentation, see *Java Class Library Guide* and *PSQL Programmer's Guide*.

See also Java Class Library Reference in HTML format. This is a Javadoc set containing the reference for the Java classes.

Samples for Java Class Library

The following samples for the Java Class Library are provided:

- helloworld - Simple sample demonstrating connection to the Demodata database provided with PSQL. You can pass a URI parameter if security is enabled on your machine.
- join - Demonstrates SQL joins
- serialization - Demonstrates how to serialize Java objects.

- pvideo - This sample simulates the management of a video store. A separate Pvideo database is provided if you wish to run this sample.

Known Issues

Known issues for PSQL v13 are published on the [Actian website](#).

Technical Support

You can obtain technical support from several online options at the [Actian website](#):

- Knowledge Base. Search hundreds of articles for answers and solutions others have found useful.
- Community Forums. Join a technical discussion or post a question to start a new one.
- PSQL Database Support. Open a service ticket, submit a defect, or purchase support.
